PROFESSIONAL SUMMARY

Full-stack Software Engineer with 5+ years of experience in Laravel, Django, React, and mobile apps. Builds large web platforms, healthcare systems, and business software that are fast and easy to grow. Also uses AI coding tools (Claude, ChatGPT, DeepSeek) to work faster and write clean, reliable code for both web and mobile.

PROFESSIONAL EXPERIENCE

Sr. Software Engineer

July 2021 – Present

Byte Trek Limited

- **SignatureCare Healthcare Platform** 🔗: Rebuilt the website from WordPress to Laravel (API), React.js (admin), and Next.js (public site) – moved 800+ pages, added 10-language support with English fallback, and built a React.js dashboard so non-technical staff can manage content themselves.
- **Employee Management System** 🔗: Laravel & Livewire HR app with role-based access (admin, team lead, employee), ZKTeco fingerprint attendance, and automatic payroll, leave, and shift scheduling.
- **Patient Survey Web Application** 🔗: Tablet-based Livewire survey – low ratings send instant staff alerts, high ratings show a QR code for public reviews. Builds PDF/Excel reports and logs every email and SMS.
- **Healthcare Credentialing System** 🔗: Django app that tracks staff document expiry with a live compliance dashboard; one Excel upload adds 100+ employees and auto-assigns the documents each job role needs.
- **Facility Inspection Portal** (*in development*): Laravel & Livewire app replacing paper forms for monthly ER inspections (7 sections, 100+ items); auto-creates issue tickets, uses Google login, and shows each manager only their own locations.
- **EPowerDoc RPA Automation**: UiPath robot that prepares doctors' daily task lists automatically, removing a slow manual step.
- Set up automatic deployment (GitHub Actions → cPanel), Docker environments (MySQL, Redis), and Swagger API docs; added automated tests (Pest/PHPUnit).

Junior Software Developer

November 2020 – June 2021

Kinetix BD

- **Inventory Management Platform**: A full-stack Livewire app that processes orders in real time.
- **Pharmacy Management System**: Tracks prescriptions and reorders medicine automatically.
- **Employee Management Module**: Handles attendance, leave, and staff performance.
- Improved APIs and database queries, making the app 40% faster.

TECHNICAL SKILLS

Backend

Laravel

Django

PHP

Python

Redis

Frontend

React.js

Next.js

Vue.js

JavaScript

Livewire

Databases

MySQL

PostgreSQL

MongoDB

Mobile

React Native

Flutter

UI Frameworks

Tailwind CSS

Bootstrap

jQuery

Automation & Misc

UiPath RPA

Java

WordPress

C/C++

DevOps & Tools

Docker

CI/CD

Git

Linux

Jira

AI Coding Agents

Claude

ChatGPT

DeepSeek

Copilot

PERSONAL PROJECTS

Zap Sticker Studio – SaaS Platform

Laravel • Livewire • Tailwind CSS

Dashboard for managing sticker packs with RESTful API for mobile integration, supporting multi-pack management and streamlining publishing workflows

Electronic Medical Records (EMR)

Laravel • Bootstrap • MySQL

Appointment scheduling, medical history tracking, and document management; reduced paperwork overhead and improved patient data retrieval speed

Inventory Management System

Laravel • Livewire • Bootstrap

Real-time stock tracking with comprehensive report generation; automated reconciliation reducing manual effort significantly

House Rent Management System

Laravel • Livewire • jQuery • Bootstrap

Tenant tracking, payment processing, and automated rent reminders; reduced administrative workload for property managers

EDUCATION

BSc in Computer Science & Engineering

Sylhet Engineering College, Shahjalal University of Science & Technology (SUST)

January 2013 – January 2018 • CGPA: 3.36/4.00

Jamuna Sar Karkhana School and College

HSC: GPA 5.0/5.0 (2012) SSC: GPA 5.0/5.0 (2010)

COMPETITIVE PROGRAMMING

- UVa Online Judge: [Profile](#)
- Codeforces: [Profile](#)

LANGUAGES

Bangla: Native • **English:** Professional working proficiency • **Urdu:** Understand (reading/listening)

INTERESTS

Reading • Travelling • Biking
